

Antonio Martínez Fernández

Senior Full-Stack Developer | Angular, Python, React & Node.js

 antoniomartinezfernandez17@gmail.com  (34) 627-129-659  [Portfolio](#)  [Github](#)  [Linkedin](#)  Spain

PROFESSIONAL EXPERIENCE

Frontend developer (Angular, RxJS) | [Metrica Sports](#) - June 2025 - Present | Full-time

- Developed high-performance, reactive interfaces for a professional sports video analysis platform using Angular.
- Built and took ownership of features from scratch to MVP and full production deployment in a fast-paced international startup environment.
- Managed complex state and real-time data flows using RxJS.
- Delivered cross-platform applications using Angular, Electron, and Ionic
- Collaborated closely with product and design teams to improve UX/UI and performance

Full-Stack Developer (Python, Angular, FastAPI) | [Bionet](#) - October 2023 - June 2025 | Full time

- Designed and implemented a microservices architecture using Python (FastAPI) and Redis for real-time communication between hardware and software systems
- Developed full-stack solutions for embedded bioreactor systems, integrating frontend (Angular), backend (Python - FastAPI), and low-level hardware communication (OPC UA)
- Acted as software lead for multiple devices, coordinating with electronics teams and stakeholders
- Led the migration from Angular 12 to Angular 19, improving maintainability and performance
- Contribute to architecture planning and decision-making for system design.
- Implemented backend testing (pytest) and frontend testing (Karma, Jasmine)

Founder and Lead Developer (Python, React, AWS) (Open Source Project) | [Spotify Electron](#) - May 2023 - Present | Freelance

- Led a 25+ contributor open-source project, managing workflows, PRs, and releases.
- Designed a distributed music streaming architecture using AWS (S3, CloudFront, Lambda).
- Built REST APIs with FastAPI, MongoDB, and JWT authentication.
- Developed a cross-platform desktop app using React, TypeScript, and Electron.
- Delivered a scalable system replicating core Spotify features with additional user-driven functionality.
- **Implemented CI/CD pipelines (GitHub Actions) and Dockerized environments.**

Frontend Developer | [Mayor Óptica](#) - January 2023 - June 2023 | Freelance

- Delivered a complete website from concept to production.
- Designed UX/UI and built a responsive, performance-optimized frontend.
- Managed deployment and launch of a production-ready solution.

Full-Stack Developer (PHP, JavaScript) | [ByProx](#) - January 2022 - June 2022 | Internship

- Developed a full-stack travel application using PHP, JavaScript, and MySQL
- Designed hierarchical navigation across locations and points of interest.
- Built responsive UI with HTML, CSS, and JavaScript.

SKILLS

• Python • Typescript • React • Angular • FastAPI • AWS • Node.js

EDUCATION

Bachelor Degree's on Computer Science

- Software Engineering Specialization (2019-2023) **7.5/10 (3.3/4 GPA)**
- **Honors** in Software Architecture

MongoDB Python Developer Path

EF SET English Certificate 88/100 (C2 Proficient)

LANGUAGES

- **English:** Professional Working Proficiency (C1)
- **Spanish:** Native/Bilingual

PROJECTS

adventjs-cli - October 2025 - Present

The all-in-one command-line tool for AdventJS challenges. Save hours of repetitive setup with a single command and focus on solving, not configuring.

- Generates a TypeScript solution template, problem docs, and Jest tests.
- Fully preconfigured environment with debugging, linting, formatting, and CI.
- Consistent workflow every year, built from personal experience.

AdventJS 2024 - December 2024 - December 2025

Completed all 25 coding challenges of the AdventJS 2024 event by [midudev](#), solving progressively harder problems in JavaScript and TypeScript (with some Python). Focused on algorithm design, problem-solving, and clean, testable code. Solutions are fully documented and automated where possible.

Portfolio - March 2023 - Present

Designed and developed a responsive portfolio using Astro, Tailwind CSS, JavaScript, and CSS to showcase not only my projects and skills, but also my personal style, approach, and professional identity. Includes sections for About Me, Technologies, Projects, and Contact, providing an authentic online presence that reflects who I am as a developer.
